Art Unit: 1781

The Information Disclosure Statement filed April 20, 2007 has been considered. It is noted that reference AJ has been lined through as the document number and date do not match.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 63-67 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 63 and its dependent claims are indefinite as to "(t)he composition according to claim 59" as claim 59 is not a composition claim.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 37-101 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Wolf et al (US 5114492).

Wolf et al teach a composition and process for preparing comprising preparing a caramelized carbohydrate and removing color, wherein the composition is used in foods and beverages such as beer (see entire patent, especially Figure 1).

The claims appear to differ as to the recitation of absorption values, the presence of pyrazine derivatives, and the resistance to light induced flavor changes.

The claimed absorption values, pyrazine amounts, and light resistance would be no more than inherent and/or obvious to that of Wolf et al as the same components and process steps are used.
